

Cheulong Sear

Web Developer

- Junior Web developer able to build a Web ___ from concept, navigation, layout and programming to UX and SEO.
 - Fast learner, hard worker and team player who is proficient in an array of scripting languages and multimedia Web tools.
-

Personal Statement

I am looking to have a career in web development after completing my course at CAMT. I am excited and enjoy about new opportunities to learn things that I do not know which I think is a good trait. I am always pushing myself to do better. I work well both independently or as part of a team as I can get feedback from people and give me ways to improve my skills.
